The Thomson Reuters Corporate Responsibility Indices

Index Description. The Thomson Reuters Corporate Responsibility Indices are a suite of benchmarks designed to measure the performance of companies with superior ratings for Environmental, Social and Governance practices. The indices represent a comprehensive benchmarking system for CSR investors and are powered by “dynamic” ratings based on the Thomson Reuters ASSET4 ESG database. A universe of over 4,600 companies worldwide are rated in over 225 key indicators of ESG performance.

Index Performance. The Thomson Reuters CRI Developed Markets (ex-US) ESG Total Return Index (TICKER: TRESGDXT) increased +3.55% from 1020.14 to 1056.36 in the quarter ended March 2015. This compares to an increase in the MSCI EAFE Total Return Index (TICKER: GDDUEAFE) of 5.00%.

The Thomson Reuters CRI Developed Markets (ex-US) ESG Total Return Index decreased -2.94% in the past 12 months. This compares to a -0.48% drop in the MSCI EAFE Total Return Index.

Inclusion Criteria. Each index is derived from an underlying index published by S-Network Global Indexes that is defined by the relevant region and capitalization sector. The Thomson Reuters Corporate Responsibility Indices are constructed to be sector-neutral to their underlying indices. They are also constructed to have consistently higher ratings as measured by the Thomson Reuters Corporate Responsibility Ratings (TRCRR). Using the TRCRR, which are based on data provided by ASSET4, half of the companies in each of the ten Thomson Reuters Business Classification (TRBC) sectors in the underlying index are included in the relevant TRCRI.

Weighting Methodology. Eligible stocks are weighted within each sector based on a combination of their float/market capitalization and their TRCRR. Company weights within each sector are then modified by the sector weight of the underlying Index.

Rebalancing. The Thomson Reuters Corporate Responsibility Indices are rebalanced quarterly on the third Friday of the last month of each calendar quarter and reconstituted annually on the third Friday of December.

Index Data. The Thomson Reuters Corporate Responsibility Indices are calculated by Thomson Reuters PLC. Price-only index values are distributed throughout the day at fifteen second intervals in both USD and EUR. Total return and net total return index values are distributed once daily, immediately following the close of trading on US stock markets on each business day. Daily values are available from December 31, 2007.
